Objective

To establish myself in the field of education, to utilize my skills and experience which I have gained in my professional career to help students to achieve high improvements in academics.

WORK EXPERIENCE

- Working as a **Assistant Professor in Dept of CA & IT, Thiagarajar College, Madurai** from **July 2011 to Till Now**.
- **14 years of teaching experience**
- Working as a Computer Counsellor in Distance Education of Madurai Kamaraj University.
- Worked as a **Project Manager** in **ITC Solution, Madurai** from July 2010 to June 2011.
- Worked as Java Trainer and Programming Developer in TANDEM INFOTECH Ltd. since Jan 2006 to mar 2010.

TEACHING EXPERIENCE

- Delivered Lectureship on SUN JAVA in **THIGARAJAR COLLEGE OF ENGINEERING**. More than three PLACEMENT programs
- Delivered Lectureship on SUN JAVA in **THIGARAJAR SCHOOL OF MANAGEMENT**. More than two months.
- Worked as **Senior** SUN JAVA Trainer in TANDEM INFOTECH Ltd.
Since Jan 2006 to mar 2010
- Delivered more than 25 Seminars in various **ENGINEERING and ARTS Colleges**.
- Delivered open Seminars for **corporate companies** and employs (MazenetSolution, HCL).

CERTIFICATION

- **SCJP (Sun Certified Java Programmer for Java2 platform1.4).**
- **MCP (Microsoft certified professional for SQL server 2000).**

EDUCATIONAL QUALIFICATIONS

- **M.C.A** from Madurai Kamaraj University college (**Regular**)
- **M.Phil. Computer Science** from Madurai Kamaraj University college (**Regular**)
- **B.Ed. Computer Science** from Tamil Nadu Teacher Training Board (**Regular**)
- **(Ph.D.) Computer Science – IoT** Authentication Security.

TECHNICAL SKILLS

Language	:	Java, C++, python, c#
Web Technologies	:	Servlet, JSP, Ph. Dot-Net
RDBMS	:	Oracle 9i. MySQL, SQL Server.
Operating Systems	:	Windows Xp, Linux.

PERSONAL PROFILE

Name	:	S. kumarappan.
Marital Status	:	Married.
MAIL-ID	:	kumarappanin@gmail.com.
Communication Address	:	#New No: 5/426, Old No: 5/435 Kumaran cross street, SadasivaNagar, Madurai--625020.

DECLARATION

I hereby declare that the above written particulars are true to the best of my knowledge and belief.

Sincerely,

(S. Kumarappan)

Online maternal health care and consultation forum

1. Abstract:

The "Online maternal health care and consultation forum" is a digital platform designed to streamline and enhance the prenatal care experience for expectant mothers. This website provides a convenient and efficient way for pregnant women to schedule, manage, and receive healthcare appointments during their pregnancy journey. The primary goal of this platform is to prioritize the health and well-being of both the mother and the unborn child by simplifying the appointment booking process and ensuring timely access to healthcare professionals. The website offers an intuitive and user-friendly interface, making it accessible to pregnant women of all technological backgrounds. Users can create personal accounts, providing essential information such as their name, contact details, and expected due date. Pregnant women can browse through a list of healthcare providers (obstetricians, midwives, or specialists) and view their availability. They can select a suitable date and time for appointments, including prenatal check-ups and other necessary medical visits. The platform sends automated reminders and notifications to users about upcoming appointments, helping them stay organized and punctual. To accommodate various preferences and situations, the website may include telemedicine options for virtual consultations when in-person visits are not possible. The website offers a comprehensive library of pregnancy-related information, including articles, videos, and tips for prenatal care and well-being. In case of urgent situations or unexpected complications, the website provides easy access to emergency contact information and resources. The platform may integrate with healthcare providers' electronic health record systems to ensure seamless sharing of medical information and history. To cater to a diverse user base, the website can offer multilingual support to accommodate users from different language backgrounds.

2. Objectives:

The objectives of the project are as follows:

- ✓ To create a user-friendly digital platform that simplifies appointment scheduling for pregnant women with healthcare providers.
- ✓ To integrate a real-time hospital locator feature that helps users find nearby hospitals and healthcare facilities.
- ✓ To provide comprehensive information about hospitals, including specialties, services, contact details, and user reviews.
- ✓ To streamline appointment management by allowing users to create personalized pregnancy schedules.
- ✓ To offer telemedicine options for virtual consultations when in-person visits are not possible.
- ✓ To encourage user engagement and community building by enabling reviews and ratings.
- ✓ To ensure data privacy and security for sensitive user information, especially healthcare data.
- ✓ To cater to a diverse user base by offering multilingual support.

3. SYSTEM ANALYSIS

3.1 Existing System:

In the existing system, pregnant women often face challenges in:

- ✓ Finding and booking appointments with healthcare providers efficiently.
- ✓ Locating nearby hospitals and healthcare facilities quickly, especially in urgent situations.
- ✓ Accessing comprehensive information about hospitals and healthcare services.
- ✓ Managing their pregnancy schedules effectively.
- ✓ Navigating language barriers in accessing healthcare information.
- ✓ Ensuring the privacy and security of their healthcare data.

3.1.1 Limitations of Existing System:

The limitations of the existing system may include:

- ✓ Inefficient appointment scheduling and management.
- ✓ Difficulty in locating nearby hospitals in real-time.
- ✓ Limited information about hospitals and services.
- ✓ Lack of support for telemedicine.
- ✓ Limited user engagement and community building.
- ✓ Potential data privacy and security concerns.
- ✓ Challenges for non-English-speaking users.

3.2 Proposed System:

The proposed system addresses these limitations by offering:

- ✓ Streamlined appointment scheduling and management.
- ✓ Real-time hospital locator with detailed profiles.
- ✓ Personalized pregnancy schedules.
- ✓ Telemedicine options for virtual consultations.
- ✓ User reviews and ratings for community engagement.
- ✓ Robust data privacy and security measures.
- ✓ Multilingual support for a diverse user base.

The forum aims to empower expectant mothers with a user-friendly, comprehensive, and secure platform that enhances their pregnancy care experience, ensures timely access to healthcare services, and fosters community engagement among users.

4. Scope of the Project

A pregnancy care web application developed using Angular offers a comprehensive platform for expectant mothers and healthcare providers, facilitating improved prenatal and postnatal care. This project's scope includes features such as personalized health tracking, appointment scheduling with healthcare professionals, educational resources on pregnancy and childcare, a community forum for sharing experiences, and real-time monitoring of vital health metrics. Additionally, it can integrate telemedicine capabilities to enable remote consultations and ensure easy access to medical expertise. By addressing the holistic needs of pregnant women, this web application contributes to enhancing maternal and child health outcomes while fostering a supportive online community for sharing knowledge and experiences during this transformative period.

5. SYSTEM SPECIFICATION

5.1 HARDWARE REQUIREMENTS

PROCESSOR: Intel(R) Core (TM) i3-6006UPU@2.00G2.00GHz

RAM : 4 GB

Hard Disk : 500 GB

5.2 SOFTWARE REQUIREMENTS

Operating System: Windows 10

Platform : Web Development

Technology : Angular CLI

Language : HTML, CSS and Typescript(JS)

Editor : Microsoft word processor

Front-End : Angular JS

Back-End : MYSQL, PHP

For Development: Visual studio code

For Design: HTML, Visual studio designer

6. Modules

- ✓ Registration and Authentication
- ✓ User Profile Management
- ✓ Search and Browse Providers
- ✓ Appointments
- ✓ Health Promotion and Preventive Care
- ✓ User Reviews and Ratings
- ✓ Admin Dashboard

6.1. Module Description:

6.1.1 Registration and Authentication:

- User
- Admin

User Registration:

This is the process by which individuals who want to use the pregnancy care appointment booking website create their own accounts. During registration, users typically provide their personal information such as name, email, password, contact details, and possibly other relevant data. This information is stored securely in the database and used for user identification and communication.

User Authentication:

Authentication is the process of verifying the identity of a user who is trying to access the website. It ensures that the person attempting to log in is indeed the legitimate owner of the account. User authentication typically involves entering a valid username or email and a password. Once the user provides this information, the system checks it against the stored data during the registration process. If the credentials match, the user is

granted access to their account. It's crucial for maintaining the security and privacy of user accounts and their data.

Admin Registration and Authentication:

✓ Admin Registration:

Admin registration is the process through which individuals with administrative privileges create their own accounts to access the admin panel of the pregnancy care appointment booking website. Admins typically have elevated permissions and are responsible for managing user data, appointments, and the overall operation of the platform. During admin registration, they provide their details, and their accounts are created with specific roles and permissions.

✓ Admin Authentication:

Admin authentication is the process by which the system verifies the identity of administrators who are trying to access the admin panel. Similar to user authentication, it involves entering a valid admin username or email and a password. The system checks these credentials against the admin account data in the database. Successful authentication grants the admin access to the admin panel where they can perform tasks such as user management, appointment management, and other administrative functions.

6.1.2. User Profile Management:

User profile management is a feature within a web application that enables registered users to create, edit, and manage their personal profiles. It typically includes a range of functionalities and settings that allow users to

Profile Creation:

Users can create a profile by providing personal information, such as their name, contact details, and any relevant health information. This information is stored securely and can be updated as needed.

Profile Editing:

Users can modify their profile information at any time. They may change their contact information, add or update medical history, upload a profile picture, and more.

Communication Preferences:

Users can set their preferences for receiving notifications, reminders, and newsletters. They may choose their preferred communication channels (email, SMS, etc.).

Appointment History:

Users can view a history of their past and upcoming appointments. This feature provides transparency and helps users keep track of their scheduled medical appointments.

Change Password:

Users can change their login password for added security. This feature is essential to maintain the integrity of their accounts.

6.1.3 Search and Browse Providers:

"Search and Browse Providers" is a functionality within the pregnancy care appointment booking website that enables users to search for, discover, and learn more about healthcare providers who offer pregnancy care services.

Search Functionality:

Users can search for providers using various search criteria such as location, specialty, doctor's name, clinic name, or specific services related to pregnancy care. The search results provide a list of relevant providers based on the user's input.

Filters and Sorting:

Users can apply filters to narrow down search results. Filters may include options to refine the search by distance, availability, ratings, reviews, accepted insurance, and other relevant criteria. Sorting options allow users to arrange results by relevance, ratings, or proximity.

Provider Profiles:

When users click on a provider from the search results, they can access a detailed profile of that provider. The profile typically includes information like the provider's name, photo, contact information, office hours, location, services offered, specialization, experience, qualifications, patient reviews, and ratings.

6.1.4 Appointments:

✓ Booking

✓ Cancelling

Booking Appointments:

- **Search and Selection:**

Users can search for healthcare providers and select a preferred provider based on various criteria, such as location, specialty, and availability.

- **Available Time Slots:**

Users can view the available time slots for the selected provider and choose a convenient appointment time.

- **Booking Form:**

Users are presented with a booking form to provide relevant information, including the reason for the appointment, any specific medical concerns, and contact details.

- **Confirmation:**

After filling out the booking form, users receive a confirmation of the appointment, which includes the date, time, and location. An email or SMS notification may be sent to the user as well as the provider.

- **Managing Appointments:**

- ✓ **Appointment Dashboard:**

- Users have access to a personal dashboard where they can view all their scheduled appointments.

- ✓ **Appointment Details:**

- Users can click on an appointment to access additional details, such as the provider's name, contact information, and appointment notes.

- **Rescheduling:**

Depending on the platform's policies, users may have the option to reschedule appointments, choosing a different date and time.

- **Notification Reminders:**

The platform can send reminder notifications to users as the appointment date approaches.

Cancelling Appointments:

- **Cancellation Request:** Users can request to cancel an appointment through the platform. They may need to provide a reason for cancellation.
- **Confirmation:** After requesting the cancellation, users receive a confirmation of the cancellation request.
- **Provider Notification:** The platform should notify the healthcare provider of the cancellation request. The provider may confirm or reschedule the appointment, or the appointment slot may be made available for other patients.
- **Refund Policies:** If applicable, the platform should follow established refund policies and procedures for appointment cancellations.

6.1.5 Health Promotion and Preventive Care

☐ Healthily foods

☐ Physical and Emotion fitness

Healthy Food:

- **Nutrition Information:**

Provide information on the importance of a balanced diet during pregnancy, including the essential nutrients, vitamins, and minerals needed for both the mother and baby's health.

- **Dietary Guidelines:**

Offer dietary guidelines and recommendations for pregnant women, with a focus on foods to eat, foods to avoid, and portion control.

- **Recipes and Meal Plans:**

Share healthy recipes and meal plans suitable for pregnancy, including options for various dietary preferences and restrictions.

- **Shopping Lists:**

Offer customizable shopping lists for users to easily purchase the ingredients needed for healthy meals.

Physical Fitness:

- **Exercise Guidelines:**

Provide guidance on safe and effective exercises during pregnancy, emphasizing the benefits of maintaining physical fitness while pregnant.

- **Workout Routines:**

Share pregnancy-specific workout routines, including aerobic exercises, strength training, and flexibility exercises.

- **Safety Tips:**

Offer safety tips and precautions for exercising during pregnancy, including hydration, posture, and warning signs to watch out for.

Emotional Fitness:

- **Mental Health Resources:**

Offer information about the importance of emotional well-being during pregnancy and provide access to mental health resources and support.

- **Stress Management:**

Share stress management techniques, relaxation exercises, and mindfulness practices suitable for expectant mothers.

- **Community and Support Groups:**

Connect users with online communities and support groups where they can share experiences, seek advice, and find emotional support from other pregnant women.

6.1.6 User Reviews and Ratings:

Review Submission:

- **User-Friendly Interface:**

Provide a simple and user-friendly interface for users to submit reviews and ratings.

- **Textual Reviews:**

Allow users to write detailed textual reviews describing their experiences with a specific healthcare provider, clinic, or specialist.

Rating System:

- **Star Ratings:**

Implement a star rating system (typically ranging from 1 to 5 stars) to let users assign scores based on their satisfaction and experience.

- **Criteria for Rating:**

Define specific criteria for rating, such as professionalism, bedside manner, wait times, and overall experience.

- **Filter and Sort Reviews:**

Allow users to filter and sort reviews based on various factors, such as the most recent, highest rated, lowest rated, or most helpful reviews.

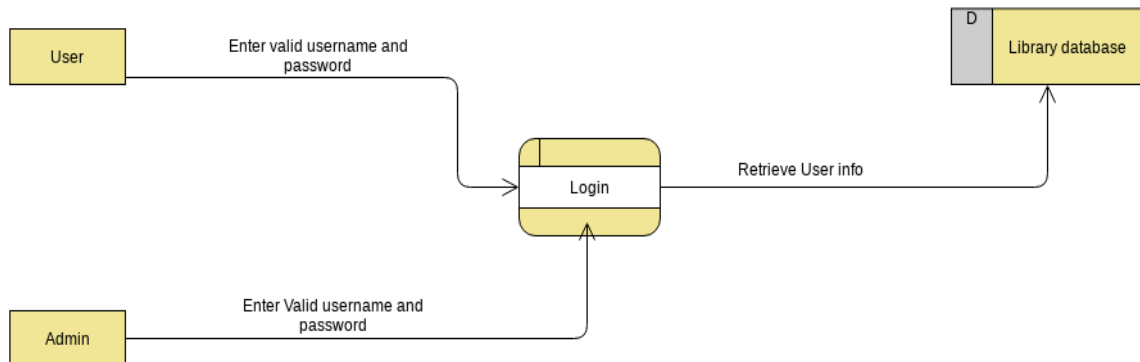

Offer filtering options for specific healthcare providers, clinics, or specialists.

6.1.7 Admin Dashboard:

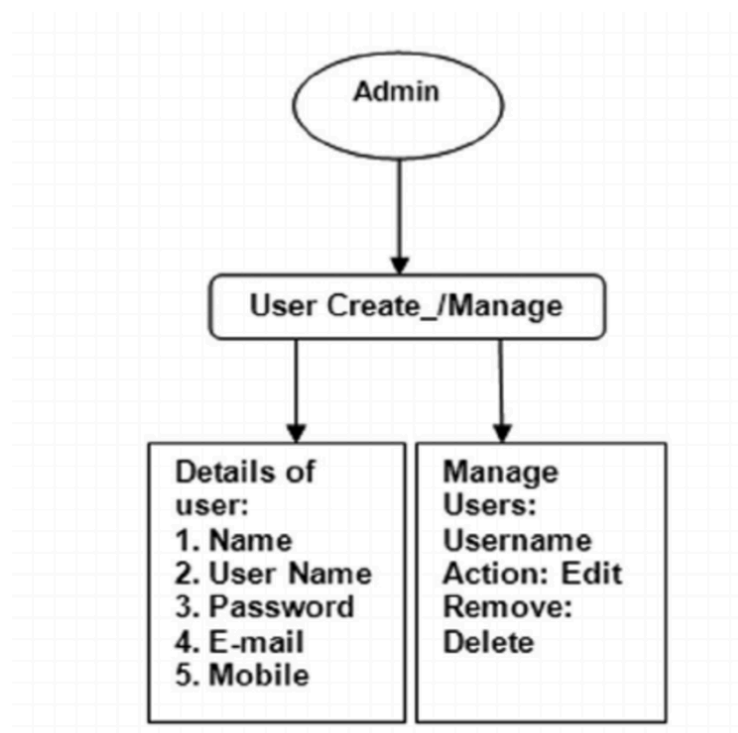

An administrative module for managing user accounts, provider listings, and resolving disputes or issues.

7.4. Admin Dashboard

8. Conclusion

In conclusion, the development of the Pregnancy Care Forum represents a significant advancement in healthcare accessibility and convenience for expectant mothers. This project aimed to address the challenges faced by pregnant women in accessing timely and appropriate healthcare services. Through a user-centric design and robust feature set, the website has successfully achieved its primary objectives.

The website's core modules, including User Registration and Authentication, User Profile Management, Search and Browse Providers, Appointment Booking, Notifications and Reminders, User Reviews and Ratings, and the Admin Dashboard, have collectively contributed to a seamless and efficient user experience.

Through user feedback and usability testing, we have gathered valuable insights that have informed the development process. Users have reported increased ease of finding and booking appointments with trusted healthcare providers. The reviews and ratings system has promoted transparency and quality in healthcare services, empowering users to make informed decisions.

The project's commitment to data security, privacy, and user-friendly design aligns with the highest standards in the healthcare industry. We have also incorporated flexibility for future enhancements, including potential features such as telehealth integration, expanded search filters, and further improvements to the user interface.

However, it is essential to acknowledge that the success of the Pregnancy Care Appointment Booking Website does not end with its deployment. Continuous monitoring, regular updates, and responsiveness to user needs are crucial for its sustained impact and relevance.

9. Future Enhancement

In the future, there are several potential enhancements that can be integrated into the pregnancy care web application to further elevate its utility and user experience. Some of these enhancements include incorporating machine learning algorithms for personalized health recommendations and risk assessment, enabling wearable device integration for real-time health data synchronization, expanding the educational content with multimedia resources and interactive tools, and integrating electronic health record (EHR) systems to streamline healthcare provider interactions. Additionally, features like pregnancy milestone tracking, baby development updates, and virtual parenting classes can be added to provide users with more comprehensive information and support throughout their journey to parenthood. Furthermore, expanding the application's accessibility and multilingual support can ensure that a broader and more diverse user base can benefit from its resources and services.
